

Chain of Custody Program

Mitsui Home Canada Inc. is committed to the control of sustainably managed forest products being received, processed, inventoried and reloaded at our Langley facilities to maintain complete compliance with our PEFC Chain of Custody program.

Management control procedures have been developed and implemented to segregate certified from non-certified wood products for our remanufacturing operations where necessary, in conjunction with the control processes for volume credit method.

This commitment is made to provide assurance to all our valued customers that the products they receive from Mitsui Home Canada Inc. will be from forest-certified suppliers and manufacturing centres in accordance with their specified requirements. They get our commitment in writing when they request our Chain of Custody Certificate.

We have communicated the control requirements and our commitment to our Chain of Custody program to our employees to ensure understanding and compliance.

The public will see our commitment to Chain of Custody through our website.

Mitsui Home Canada Inc. is committed to comply with the requirements defined in Section 9 regarding Social Conditions and Health and Safety Standards.
