

Chain of Custody Program

Mitsui Homes Canada Inc. is committed to the control of sustainably managed forest products being received, processed, inventoried and reloaded at our Langley facilities to maintain complete compliance with our PEFC Chain of Custody program.

Management control procedures to segregate certified from non-certified wood products have been developed and implemented for all areas of our operation where Chain of Custody must be maintained for our end customers.

This commitment is made to provide assurance to our valued customers that the products they receive from Mitsui Homes Canada Inc. will be from forest-certified suppliers and manufacturing centres in accordance with their specified requirements. They get our commitment in writing when they request our Chain of Custody Certificate.

We have communicated the control requirements and our commitment to our Chain of Custody program to all our employees to ensure understanding and compliance.

The public will see our commitment to Chain of Custody through our website.

Mitsui Homes Canada Inc. is committed to comply with the requirements defined in Section 9 regarding Social Conditions and Health and Safety Standards.

Tatsuya Suzuki
President
